The OIE International Standards

Currently, Kazakhstan started to reorganize their national veterinary services, upgrading its system of standards, focusing on standards and recommendations The OIE
Under the strategy are developed comprehensive plans for the control, prevention, elimination of highly dangerous animal diseases (FMD, brucellosis).

Used veterinary diagnostic and public immunization drugs that meet international standards, including GMP / GLP with the phased development of the domestic bioindustry which will bring together leading manufacturers of the world.
Within the framework of cooperation to ensure the well-being of the epizootic on the territory of Central Asia in late 2013 opened the OIE SUB-REGIONAL Coordination Office FMD in Astana

- strengthen the control of FMD;
- develop a common approach and strategy for FMD at the regional level;
- promote regional cooperation on all veterinary services FMD under the auspices of The OIE
- improving the efficiency of the national veterinary services of the Central Asian countries, responsible for the control of FMD in accordance with the recommendations of The OIE
the OIE SUB-REGIONAL Coordination Office FMD in Astana and World Organization for Animal Health

- invites you to participate in The OIE Regional Seminar “5th meeting on the Road map of FMD in Western Eurasia” in Astana from 23 to 24 April.
THANK YOU FOR YOUR ATTENTION!
