Epidemiology

Epidemiological comments

- The protection and surveillance zones have been established in accordance with European Union legislation (European Commission Decision 2006/115/EC). Gråsten is located within the surveillance zone established on 29 March 2006 in Southern Jutland. All poultry within the zones must be kept inside and all poultry holdings - including hobby holdings - must be registered. The Danish Veterinary and Food Administration will inspect all poultry holdings in the protection zones in order to look for possible further spread of avian influenza. Restrictions on movement of eggs and poultry have been imposed within the zones. All hunting within the zones is also prohibited.

- Several protection and surveillance zones have been lifted since the end of March. Information about removal of zones can be accessed on the Danish Veterinary and Food Administration's website.

- The latest news about avian influenza detected in wild birds in Denmark (including maps of the established protection and surveillance zones) can be accessed on the Danish Veterinary and Food Administration's website:
