Wild species	Animals	1	1	1	0	0		
Affected Population a hawk eagle								

Outbreak summary: Total outbreaks = 5 (Submitted)

Species	Susceptible	Cases	Deaths	Destroyed	Slaughtered
Birds	169500	7332	7332	162168	0
Wild species	1	1	1	0	0

Epidemiology

Epidemiological comments
On 13 January 2007, immediately after the presence of highly pathogenic avian influenza was recognized, stamping out was applied to all poultry in all the affected farms in Japan. The disinfection of the last affected farm was completed on 7 February 2007, and no additional case was recognized through the surveillance in accordance with Appendix 3.8.9 of the Terrestrial Animal Health Code in Japan.
Japan declares that it has met the requirement for the recognition as a country free from avian influenza in its notifiable form (NAI) according to the Article 2.7.12.3 of the Terrestrial Animal Health Code since 8 May 2007.
Source of Infection • Unknown or inconclusive

Control Measures

No Control Measures	Animals treated	No
Vaccination Prohibited	Yes
