### Epidemiology

#### Epidemiological comments

In connection with the complete eradication of the outbreak of HPAI in Piski village (Burinskiy district, Sumy region), the quarantine restrictions imposed on this village due to HPAI were lifted, in accordance with Order No. 332 issued by the Head of Burinskiy district state administration on 19 July 2006.

Activities were carried out to raise public awareness of the need to prevent contact between wild migratory birds and domestic poultry.

On the basis of the results of the epizootic investigation and an analysis of the performance of measures aimed at eradication and prevention of HPAI in Genicheskiy district (Kherson region), the quarantine restrictions imposed due to HPAI were lifted, in accordance with Order No. 576 issued by the Head of Genicheskiy district state administration on 9 August 2006.

Permanent measures were taken to ensure that poultry kept in private households were isolated and to prevent contact between wild migratory birds and sentinel and domestic birds.

The Veterinary services in the relevant districts carried out daily clinical examination of birds of all species kept in private households.

Considering the measures taken to eradicate and to prevent the spread of HPAI and the absence of new cases, Ukraine declares itself free from HPAI in accordance with Article 2.7.12.3 of the OIE Terrestrial Animal Health Code.
