

Follow-up report No.: 1

Report reference: , OIE Ref: 6334, Report Date: 07/11/2007, Country: India

Report Summary

Disease	Highly pathogenic avian influenza	Animal type	Terrestrial
Causal Agent	Highly pathogenic avian influenza virus	Serotype(s)	H5N1
Clinical Signs	Yes	Reason	Reoccurrence of a listed disease
Date of confirmation of Event	24/07/2007	Date of Start of Event	07/07/2007
Date of report	07/11/2007	Date Submitted To OIE	07/11/2007
Diagnosis	Laboratory (basic), Laboratory (advanced)	Date Of Last Occurrence	04/2006
Number Of Reported Outbreaks	Submitted= 1, Draft= 0	Name of Sender of the report	Ms Charusheela Sohoni
Address	Dr Rajendra Prasad Road Room No 231, Krishi Bhawan New Delhi 110001	Position	
		Fax	(91-11) 23 38 80 06
Telephone	(91-11) 23 38 26 08	Entered by	Mrs Françoise Ricordel
Email	govind@aphond.delhi.nic.in		

Number Of Outbreaks 1 (other report - submitted)

MANIPUR	Imphal East	Chingmeirong	Unit Type	Location	Latitude	Longitude	Start	End
MANIPUR	Imphal East	Chingmeirong	Village	Chingmeirong West	24,816	93,933	07/07/2007	02/08/2007
Species	Measuring units	Susceptible	Cases	Deaths	Destroyed	Slaughtered		
Birds	Animals	144	134	133	11	0		
Affected Population		backyard poultry						

Outbreak summary: Total outbreaks = 1 (Submitted)

Species	Susceptible	Cases	Deaths	Destroyed	Slaughtered
Birds	144	134	133	11	0

Epidemiology

Epidemiological comments

The entire poultry population in the 0-5 km radius of the infected zone was culled. A total of 339,401 birds were destroyed during the culling operation. No further cases of avian influenza have been reported from this area or from any other part of the country.

Final culling operations were completed on 2 August 2007 followed by disinfection and cleaning up operations. Surveillance around the areas of outbreaks since completion of operations (including culling, disinfection and clean up) and surveillance in the rest of the country have shown no evidence of the presence of highly pathogenic avian influenza.

According to Article 2.7.12.4. of the OIE Terrestrial Animal Health Code, India declares that it has regained its notifiable avian influenza free country status.

Source of Infection • Unknown or inconclusive

Control Measures

Applied	<ul style="list-style-type: none">• Movement control inside the country• Disinfection of infected premises/establishment(s)• Stamping out	To be applied	• No Planned Control Measures
		Vaccination Prohibited	No
Animals treated	No		

Country / Zone

Country or zone	a zone or compartment
