

EuFMD

The European Commission for the Control of Foot-and-Mouth Disease

Activities and Opportunities

Ulrich Herzog

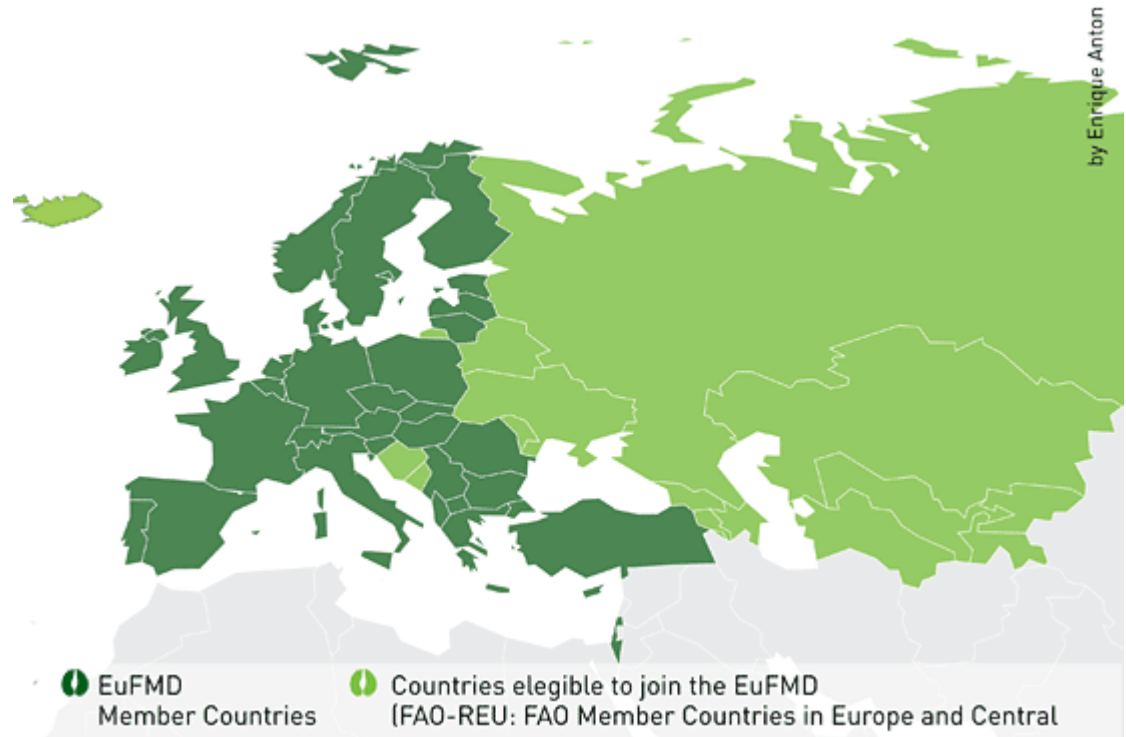

5th GF-TADs for Europe Steering Committee meeting

Who we are and what we do

- A commission of 37 member states; newest member is Georgia
- Established 1954
- Coordinates activities to prevent FMD incursions, improve emergency preparedness, and control FMD in neighbouring region
- Secretariat based in Rome, team of consultants working internationally

The EuFMD Strategic Plan: 3 Pillars

1. Improve readiness for FMD crisis management by Members.
2. Reduce the risk to Members of an FMD incursion from the neighbourhood
3. Promote the global FMD control strategy

3 Pillars of the EUFMD

- **Improve readiness for FMD crisis management:**
 - Training
 - Risk based Surveillance in Thrace-Region
 - Improve the preparedness of the Balkans Region
 - Research funding, Crisis management, Proficiency testing
- **Neighbourhood - EUFMD is active through its members:**
 - South East Europe: Turkey and Georgia
 - South East Mediterranean: Israel and Cyprus
 - REMESA: Portugal, Spain, France, Italy, Malta
- **Support of the Global Strategy:**
 - Assist FAO/OIE - Working group
 - PCP
 - Global Laboratory

THE TRAINING MENU OF THE EuFMD COMMISSION 2013-2015

.... What courses are there? And which one is the right one for you?

- Real Time Training in FMD Outbreak Investigation, **3 TC**
- Modelling and Decision Support Tools for FMD Contingency Planning **2 TC**
- FMD Vaccination as a Control Strategy **1 TC**
- Socio-economic analysis of FMD control strategies **1 TC**
- FMD Preparedness and Simulation Exercise support **2 TC**
- Risk Based Surveillance **1 TC**
- Laboratory Training on FMD diagnosis **4 TC**
- Expert backstopping mission in the country **4 TC**

Modelling and decision support tools for member states:

Objective: Enable vets at senior policy-making level to understand, interrogate and challenge the outputs of FMD models; help them set up modelling units; use outputs to aid contingency planning and policy development.

Training workshop: Vienna, Oct 2012. 16 vets, 8 member states.

Trainers: Kimberly Forde-Folle (USDA) and Shaun Case (Colorado State)

EuFMD/USDA collaboration – follow up activities under development: more workshops, e-learning

Real-time training in FMD outbreak investigation

Objective: Create a group of vets with practical field experience of FMD outbreak investigations

>200 vets from 36 member states trained

- Programme started in 2009 in Erzurum, Turkey
- 2011-13: training conducted in Nakuru, Kenya
- Trainers: Internationally recognised FMD experts
- Trainees: state veterinarians, nominated by their CVOs
- Local vets also trained – benefits flow both ways

EuFMD e-learning

- Expands reach and depth of FMD training
- Now: outbreak investigation training, support to real-time training
- Future: practical epidemiology, modelling, simulation exercise, etc
- Plan to translate into other languages: Arabic, Russian, others possible
- Relevance to FMD free countries (USA) and also endemic countries

Welcome to EuFMD e-learning
by Eoin Ryan - Monday, 27 May 2013, 1:14 PM

This site hosts the e-learning induction course which you must take prior to your real-time FMD outbreak investigation course. It also contains lots of additional information on FMD which you can use as a resource, both before and after the field training. You can find information to help give you an idea of what to expect in the field, including reports from previous training courses.

Pillar II

Risk based surveillance for early FMD detection: *Improving confidence in disease freedom in Thrace region*

Objective: establishment of a program in Thrace for risk-based surveillance to aid early disease detection and to maintain confidence in disease freedom.

- Risk-based approach to surveillance will allow improved early detection capacity and increased confidence in disease freedom.
- Initial implementation in Thrace region (Bulgaria, Greece, Turkey)
- Coordinated by national focal points in each country and data management epidemiology specialist in EuFMD, funded by European Commission
- Wider applicability: Trans-Caucasus? Tunisia/Algeria/Morocco?

Pillar III: PEPc: Practical Epidemiology for Progressive Control

- 4 week training course
- Develop capacity in epidemiology (and socio-economics) Skills to progress along PCP
- Problem-based, student oriented learning approach

- ✓Week 1: Outbreak investigation
- ✓Week 2: Socio-economics: value chains, impact assessment
- ✓Week 3: Surveys and Surveillance
- ✓Week 4: Designing a disease control strategy
