Birds	308640	30000	30000	278640	0

Epidemiology

Epidemiological comments
Cleaning and disinfection activities were completed in the premises concerned by the outbreak on 29 October 2009; since then, no other suspicion of highly pathogenic avian influenza has been reported. All birds in the farm were culled, no restocking has been carried out, and the premises are then empty.
According to the Article 10.4.3. of the OIE Terrestrial Animal Health Code (2009), a country can regain its health status 3 months after the disinfection of all affected establishments. Therefore, Spain declares regain its notifiable avian influenza free country status with effect from 29 January 2010.
Source of the outbreak(s) or origin of infection • Unknown or inconclusive

Control Measures

Applied	<ul style="list-style-type: none">• Stamping out• Screening• Zoning• Disinfection of infected premises/establishment(s)	To be applied	• No Planned Control Measures
		Vaccination Prohibited	Yes
Animals treated	No
